SUMMARY

Experienced Software Engineer specializing in front-end development. Skilled in creating high-quality solutions tailored to client requirements, with a strong commitment to staying updated on industry trends and emerging technologies.

EXPERIENCE

PT Nutech Integrasi *Jakarta, Indonesia*
Front-end Engineer *Aug 2023 – Nov 2024*

- Developed CEISA 4.0, a web app for the Indonesian Directorate General of Customs and Excise, impacting 5000+ users.
- Created 25+ document formats and implemented PDF/XLSX rendering using React-pdf, jsPDF and ExcelJS.
- Ensured app quality with comprehensive testing: unit, integration, and end-to-end.
- Implemented seamless integration of APIs using Axios.
- Built fully responsive user interfaces primarily with Ant Design.
- Collaborated with UI/UX designers to implement visually compelling and intuitive interfaces.
- Worked with cross-functional teams, including back-end and QA engineers.
- Maintained regular and effective communication with system analysts.
- Utilized Git and Jira for prioritizing enhancements and bug fixes.
- Created documentation, aiding stakeholder understanding and future maintenance.

faoTech *Remote*
Full-stack Engineer *Sep 2022 – Aug 2023*

- Managed a front-end team of 2 to 3 engineers across 3 projects.
- Built responsive web apps compatible across devices, integrating loading animations.
- Implemented essential authorization features like login, registration, and account recovery.
- Collaborated with UI/UX designers to create visually compelling user interfaces.
- Integrated internationalization support with i18next framework.
- Spearheaded back-end development, including API development, server-side logic, and database management.
- Proficient in CRUD operations and optimized API endpoints.
- Maintained comprehensive documentation to facilitate understanding with stakeholders.
- Provided ongoing maintenance and support for applications.
